Art Unit: 3661

### **DETAILED ACTION**

The amendment filed on September 12, 2003 has been entered. By this amendment, claims 4, 6, 8-10, 12-16, 20, 22, 24-26, 28-29, 31 and 32 are now pending in the application.

#### ***Election/Restriction***

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

Species I: Specification page 8, lines 3-7 (claims 4, 20) drawn to determining alignment by comparing the wheel tracks with reference values.

Species II: specification page 8, lines 3-7 (claims 6, 8, 22, 24) drawn to determining alignment by comparing the wheel base with reference values.

Species III: specification page 9, lines 15-21 (claims 9-10, 25-26) drawn to determining alignment by comparing the center point of a wheel track with a center line.

Species IV: specification page 8, lines 19-22 (claims 12, 28) drawn to determining alignment based on comparing diagonals.

Species V: specification page 9, lines 1-3 (claims 13, 29) drawn to determining alignment based on comparing each diagonals with a reference value.

Species VI: specification page 9, lines 4-10 (claims 14-16, 31-32) determining alignment using skew angles.

Art Unit: 3661

Due to overwhelming species disclosed in the claims, applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Art Unit: 3661

2. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
